RANSOME and PARSONS beg to draw the attention of Architects, Builders, and others, to their PATENT STONE, which in the composition, differs essentially from all other artificial preparations for a similar purpose—Flint forming the basis. In character, texture, and appearance it is made to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest sandstone, and to possess all their valuable enduring properties without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and manufactures, balustrades for terrace walks, vases and pedestals, &c., as also for all varieties of plain and ornamental Brickwork. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as good ordinary cement. Copies of Busts, Statuary, or other Works of Art, can be produced in the finest Patent Stone as faithfully as in Plaster of Paris.

IMPORTANT to WATER COMPANIES, MANUFACTURERS, and the PUBLIC.—RANSOME and PARSONS beg to call the attention of Water Companies, Manufacturers, and others to their PATENT STONE FILTERING SLABS, which are capable of filtering from 100 to 200 gallons of water per superficial foot per day, with a head of water varying from 3 to 4 feet. These slabs can be produced to any required dimensions, and, consequently can be adapted to any cistern, tank, or reservoir. By a simple preventionary arrangement, they are prevented from being in any way choked or impeded in their action. Prices in proportion and here will be supplied on application.

IMPORTANT to BRICKMAKERS and CONTRACTORS.—RANSOME and PARSONS are also the proprietors of HALL'S PATENT BRICK-MAKING MACHINE, capable of moulding 10,000 bricks per day and upwards, which are superior to those manufactured by hand, and are delivered at considerably less cost. Communications to be addressed to the Patentees, Messrs. RANSOME and PARSONS, Filst Wharf, Ipswich; or to 101, Newgate-street, London.

J. B. WHITE and SONS advise purchasers of PORTLAND CEMENT to ascertain if an article now selling under that name is a reduced price for the real Portland Cement or a spurious imitation of it in the shape of a Lias Lime.

ATKINSON'S CEMENT, made in London from the Stone supplied from the Mulgrave estate is well known for its quick setting properties and fine natural colour, which have distinguished it for many years as the best Cement for Casting and all ornamental purposes.—Manufacturers, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those rooms where repetition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco, it does not vegetate or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brick work, it carries four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, point it out as the fittest material for building on and beneath sound walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.

Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 30, Keel-street, Liverpool.

PORTLAND CEMENT, in Casks of Four Imperial Bushels, QUANTITY NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to No. 888, page 481; and also Nos. 884 and 885, pages 143 and 181, of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of twenty years in the Thames Tunnel to resist the action of water; it is stronger in the cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystalize, or turn green; nor is it affected by any atmospheric influences whatever the climate, resisting alike the action of frost and heat. It is manufactured to work from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 65, Hanover-street, Liverpool.

6, South Wharf, Paddington.

PORTLAND CEMENT.—FREEMAN and RICHARDSON have much pleasure in introducing to the trade the above superior CEMENT, being of uniform colour and quality, a desideratum never before attained in Portland Cement. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack, combining with which its eminent hydraulic properties stamp it as one the first Cements of the day for such purposes as the above qualities are required. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by others who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq., at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

JOHNS and CO.'S PATENT PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common lime Wash or Water Colour for STUCCO or BRICK WORK. It is a stone Colour, but may be tinted to any other.—DOES NOT WASH OFF.—It is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One cwt. will cover 350 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external surfaces, places it above all other materials of its kind; it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; is warm because so hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, 22, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.
